

Mining Surveys

Charles Taylor technical

Coal mine in far north of Scandinavia

Mining Surveys & Investigations.

Whether it is precious metals, coal or bulk ore extraction by open cast or deep mining - a detailed survey is an important pre-requisite of proper underwriting and risk management. Charles Taylor technical (CTt) has experience with various types of mines in many locations worldwide. Surveys look at extraction operations, utilities, ore processing, transportation and environmental aspects. Our Reports cover:

- Machinery Breakdown
- Property Damage
- Business Interruption

A mining version of KRRIS CTt's risk rating and benchmarking tool has been developed and is used for all surveys.

Gold mine in the Caribbean
